Magnetic Field Indicator Pie Gauge / ASTM Test Piece

Product Code: 1207

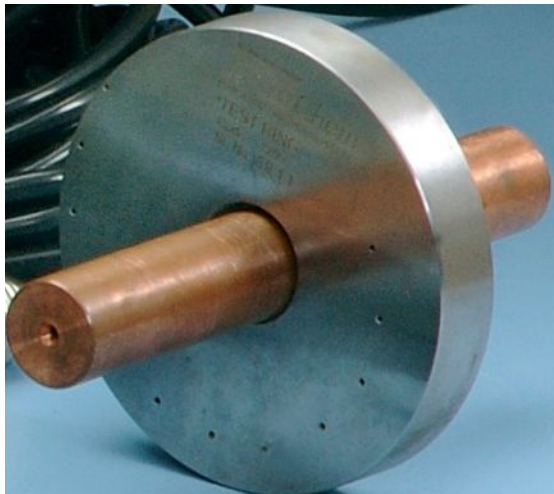

Meets ASTM E-709

One of Ferrochem's most popular products, Pie Gauge is widely exported to Europe and Asia.

Applications

Pie Gauges are used to determine the direction of magnetic field during magnetic particle testing.

Test Ring / Ketos Ring

Product Code: 1205

Meets ASTM E-709

Test Ring is a magnetic particle test piece made of special grade of steel, containing artificial defects to simulate sub-surface discontinuities.

A copper rod that serves as central conductor is also provided with this test piece.

Applications

Test ring is used as a reference for evaluating and comparing the overall performance and sensitivity of all types of magnetic powders.
